Note: “Applications, Entries, and Selections Allowed/Approved” have been removed from the table. The Federal government no longer sells or grants vast tracts of public lands to settlers, homesteaders, veterans, towns, new States entering the Union, railroads, Agricultural and Mechanical colleges and universities, and private companies. Applicants were allowed to acquire title to the public lands under various grants and by entering upon and improving the lands (i.e., homesteading). In 1976, Congress passed the Federal Land Policy and Management Act (FLPMA), which repealed the Homestead Act and put an end to large-scale disposals of public lands.

"Purchase money" includes all revenues collected during the reporting fiscal year from all ongoing cases leading to patent; however, this money is not always received in the same year that the application is allowed or approved, or in the same year that the patent is issued. Purchase money enters into the land exchange process because exchanges must result in equal value given and received by both parties; this means that cash payments are sometimes made or received by the Bureau of Land Management to ensure an equitable exchange.
